

Hand disinfection automat GIRARDELLI DA-1

The purpose of the GIRARDELLI DA-1 disinfection automat is the hygienic and surgical hand disinfection in the entire medical- and food-industry.

Contact free and time saving

- The hands/underarms are held over the spray nozzle inside the appliance.
- Integrated photosensors will activate the spraying procedure. The hand will be sprayed with disinfecting solution, which has to be rubbed into the dry skin.
- Contact free disinfection while passing by

Most economical consumption

- Through the built-in spray nozzle and the fumigation during operation, the correct dosage is always achieved and allows an economical consumption of disinfecting solution.

Ideal disinfecting solution – ideal combination

- The alcohol based solution is used for hygienic and surgical disinfection
- Especially skin compatible through skin moisturizing substances and lanolin. <free of skin hurtful long lasting agents. QAV-, phenol- and aldehyde-free.
- Broad antimicrobial effect: bactericide incl. MRSA, tuberculocide, fungicide (C. albicans), levurocide, rota virus-effective, noro virus-effective, limited virucide

Small space requirement

- Through its compact size, the appliance can be integrated very easily.
- An optional, space saving wall mount is available.

Technical data

Operational voltage:	220–240 V
Dimensions (wxdxh):	33x25x28 cm (13x9,8x11 in)
Frequency:	50/60 Hz
Power consumption:	11,2 W
Capacity of bath:	approx. 1 l
